/// About LS Fabrication

LS Fabrication Ltd. was officially established in February 2018 by long time friends Kris Hauser and Chris Lange. The company came to be after Kris, while building his own 1951 Chevy 3100 (AKA Kalinda), reached out to multiple companies and individuals in the industry for help with his firewall but nobody was able or willing to meet his needs. Knowing that his buddy Chris Lange was talented in body work and paint, Kris dropped his cab off with Lange and left it in his more than capable hands for him to work his magic.

On January 7th 2018 Chris sent a message to Kris and asked if he was sitting down. The following picture he sent was of the first ever bead rolled firewall installed on Kris' 1951 Chevy 1300 (Canadian edition of a 3100). This firewall would be what started it all for the two friends and eventually became the Kalinda style 1947-1954 Bead Rolled Firewall. After sharing photos of the firewall on their social media, it became very apparent that Kris wasn't the only one who wanted a firewall like this. One order turned into two which turned into over 10 in the first week. The two friends had a talk and decided to start a business and offer the firewalls and see where it would go.

The panels expanded in to multiple others sheet metal products for not only the 1947- 1954 GM trucks but multiple eras of GM/ Chevy trucks. Then came the idea of an all billet speaker grille and glove box for the 1947-1953 GM/Chevy trucks. It was a long and costly road but the end result was one both Chris and Kris are very proud of. Then the design for the 52-54 Gm/Chevy handles turned into a handle that worked for 1952-1966 trucks and are of the highest quality and machined in the US.

In the last 5 years the company has grown to not only offer LS Fabrication products through the website but also many cool and custom product from other companies. Thanks to much of the work of their Website and E-commerce Manager Taylor, the company has been able to have an awesome website and grow their sales year after year. Many great relationships and friendships have formed thanks to the company and some awesome trips down to Dino's Git Down in Arizona have been great for promoting the company and meeting many of the customers.

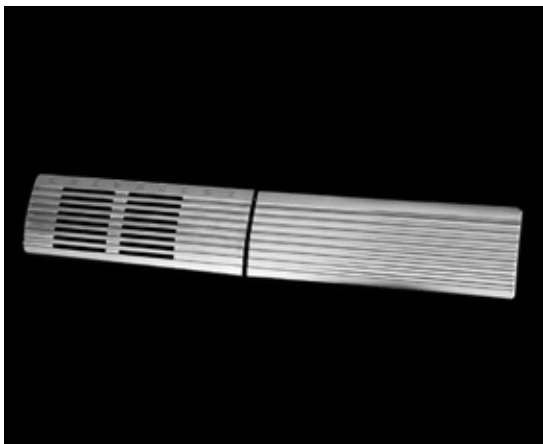

LS Fabrication has now shipped thousands of orders all over the world and supplies multiple US distributors with their products. Chris and Kris continually work on new ideas/products and ways to expand the company and fill gaps within the market or offer a better option than what might currently be available. Stay tuned, you never know what might be coming out next!

1947-1954

GMC/Chevy Truck Parts

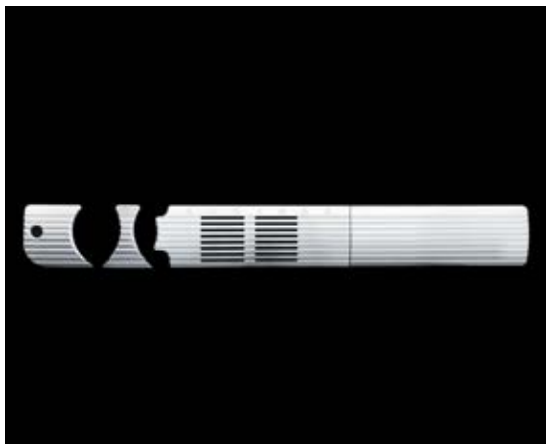

1947-1954

Billet Dash

- Fits 1947-1953 GMC / Chevrolet Trucks.
- CNC milled from 6061 aluminum.

- Malleable material that is easy to cut and install in your custom build.

\$119.99

Hood Hinges

1960-1987 GM Trucks

Metal fatigues and springs weaken over time. Just like an engine needs to be freshened, so do hinges. The new line of billet hood hinges from CVF are packed with features that don't just look the part, they play it.

Hood Hinge Features

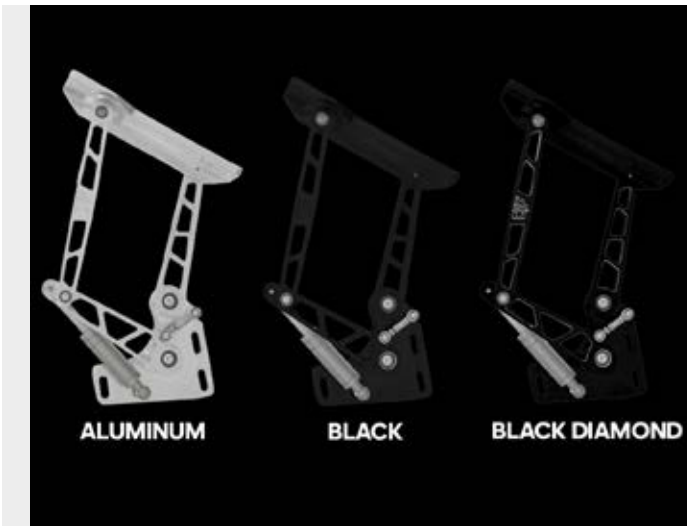

6-Axis Adjustability

6-axis adjustment built directly into the hinge, this technology affords the installer the ability to adjust hood gaps without having to remove the hood. A feature you won't find anywhere else.

Precision Machined

In addition to the 6-axis adjustment these hinges feature rock-solid gas struts and sealed bearings that connected to the stylish, precision-machined 6061-T6 billet aluminum bodies and arms. These hinges are also backed by CVF's industry-leading limited lifetime warranty.

Many Styles To Choose From

All hood hinges have at least 3 different styles to choose from. Some options are:

- Raw Aluminum
- C3 Clear Ceramic Coating
- Black
- Black Diamond

These hinges are the top quality option on the market and fit all chevy trucks from 1960-1987.

Universal Wheel Tubs

Customize your classic chevy truck bed with these premium radial Wheel Tubs.

Wheel Tub Features

Radial Design

Enhance your truck bed with stunning Universal Truck Wheel Tubs! These custom tubs are made from 16 gauge steel. Our top-of-the-line design seamlessly fits the back of any pickup truck. The best part? These tubs are perfect for classic trucks, instantly giving your vehicle a custom look. They can be welded or bolted in!

Detailed Instructions

Our tubs are sold in pairs and are easy to install, making them optimal for the do it yourself mechanic or professional. We all know what a pain it is trying to figure out the best way to install your new products without any guidance. That's why LS Fab has taken the guess work out of it - making it a breeze to get your truck bed that custom look you have always wanted!

Unique Style

These wheel tubs are radial which makes them hard to come by on the aftermarket. We were not satisfied with the existing wheel tub options on the market - as nothing quite captured the clean, minimalist look that we were looking for. So, we went ahead and made them ourselves!

Tilt Bed Scissor Hinges

- Laser cut from 3/16" stainless steel or machined billet aluminum
- Hinges are double armed to be much sturdier than any of the competitions.
- 3/8" hole tolerances have been tightened to eliminate as much play as possible.

From: \$499.99

Electric Tilt Bed Lifts

- Meant to be utilized along side our LS Fab Scissor Hinges to give you one of the coolest custom features on your classic truck.
- High quality aluminum alloy material, sturdy and sleek and can lift up to 450lbs at 0.4"/second.
- High performance motor, built-in high quality limit switch with a noise level below 50 dB.

\$164.99

Thank you for your support!

We want to personally thank every one of our customers/supporters and followers who have believed in us on this journey. We strive to offer some of the best products on the market for GM/Chevy trucks and work to fill voids and develop products that either don't exist or don't exist in a high enough quality in the industry.

Stay tuned for what we have in store! Sign up for our newsletter and follow us on our socials to stay up to date with any and all new products we offer.

Thank you,

Chris Lange

Kris Hauser

Contact LS Fabrication

- At LS Fabrication, we strive to maintain open communication with our customers.
- We **DO NOT** automate the customer support process. We deal with any issues head on – to keep our customers happy. You **WILL NOT** speak to a robot while shopping with us.
- We **DO NOT** hide the companies phone numbers to avoid speaking with you. We advertise them and we want to hear your questions and concerns.
- We stand by the quality of our products, and we wont sell you anything we wouldnt put in our classic trucks ourselves.
- Can we miss a call from time to time? Very rarely – but as stated above, we are not robots! We all need time off the clock – and if you're wondering if we will call you back ASAP? **ABSOLUTELY!**
